## Toby the Husky

Toby is the 5 year old Husky that has travelled with PawAir over 10 times. His owners decided to try PawAir after they travelled with a different airline and were promised that they would be reunited with their puppy at the destination. However, that airline forgot Toby at the airport and he ended up in quarantine.

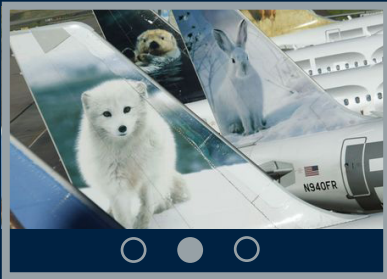

## Victoria the Monkey

Victoria is a brazilian golden lion tamarine that was trafficked to Germany in 2005. Once authorities found her in an abandoned cellar, they contacted PawAir veterinarians to take care of her and transport her back safely to her home country.

[OUR MISSION](#)

PawAir is the first airline for only pets. PawAir's mission is to guarantee every pet a safe and calming flight. Many airlines require animals to travel along with dispatched luggage or even demand them to be drugged so that other passengers aren't disturbed. PawAir is concerned with the well being and health of every animal and ensures a stress-free flight for each pet and a life changing experience for the owner.
