SMAR+PET

1. About Us

Fly through the hard stuff

SMAR+PET is a company focused on extending the emotional support that animals can provide to people that don't have the time to take care of an actual pet. SmartPets are electronic pets that keep track of their owner's daily routine, making sure that they are mentally healthy and meeting their daily goals.

SMAR+PET

2. How to use it

Make it yours!

Scan the QR code on the back of the
dog tag

Make it your own!

Thank you for giving this Smar+Pet a home!

What would you like to name it?

Is it a boy or a girl?

Is it a service dog?

SMAR+PET

2. How to use it

Connect to your devices

In order for your Smar+Pet to work, you need to give it access to your devices.

After you give your new friend a personaluty, it will ask you to allow access to the device you read the QR code with.

Will you give {pet_name} access to this device?

☐ YES

☐ NO

**terms and conditions*

The more devices you give your buddy access to, the better it can do its job! So if you want to connect it to another device, just scan the QR code with it and allow access.

SMAR+PET

2. *How to use it*

How does it work?

Smar+Pets gather data from all connected devices and uses that information to interpret your routines.

Functions:

Calendar
{to figure out your daily schedule}

Location
{to know if you are attending the events on your calendar}

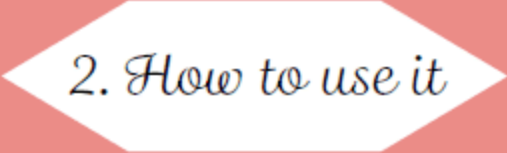

Phone and Contacts
{to see who you talk to the most and remind you to keep in touch}

Alarm
{nothing better than a bark to wake you up}

Sound
{analyses your tone of voice}

SMAR+PET

2. *How to use it*

Other functions:

- Sleep tracker
- Weather
- Step Count
- Fitness apps (exercise + meals)

Your Smar+Pet will use that information to help you stay on top of your daily routine and keep your life simple. All you have to do is listen to the *BARK* !

Once your Smar+Pet starts barking, all you have to do is pet it to snooze and it will display a message.
